

Automate compliance, improve trust, reduce risk

Meet regulatory standards effortlessly, reduce compliance risk, and keep your AI secure and transparent.

01.

Centralized AI Model Inventory & Lifecycle Management

Maintain complete visibility and control over your AI ecosystem with VerifyWise's comprehensive model registry. Track all AI models across your organization from development to retirement, ensuring regulatory compliance and operational oversight.

 - Complete AI model registry with ownership, versions, and deployment status
 - Lifecycle tracking from development through production to retirement
 - Model documentation including purpose, data sources, and risk classifications
02.

Multi-Framework Governance Templates & Checklists

Accelerate your AI governance implementation with pre-built templates and checklists for major regulatory frameworks. Get started quickly with proven governance structures tailored to EU AI Act, NIST AI RMF, ISO 42001, and more.

 - Ready-to-use templates for EU AI Act, NIST AI RMF, and ISO 42001 compliance
 - Step-by-step checklists for risk assessment and documentation
 - Customizable governance workflows for your organization's needs
 - Expert-validated templates based on regulatory best practices
03.

AI Governance Knowledge Base & Lexicon

Access the most comprehensive AI governance knowledge base with expert definitions, frameworks, and best practices. Our multilingual lexicon provides clear explanations of AI governance concepts, regulatory requirements, and technical terminology.

 - Comprehensive AI governance lexicon with expert definitions and explanations
 - Multilingual support for global AI governance terminology
 - Framework-specific guidance for EU AI Act, NIST, and ISO standards

04.

Compliance Progress Tracking & Dashboards

Monitor your AI governance progress with real-time dashboards and progress tracking. Visualize compliance status across multiple frameworks, track task completion, and get actionable insights to maintain regulatory readiness.

 - Real-time compliance dashboards with progress visualization
 - Track completion status across EU AI Act, NIST AI RMF, and ISO requirements
 - Actionable insights and recommendations for continuous improvement
05.

AI Vendor Risk Management & Assessment

Take control of your AI supply chain with comprehensive vendor risk management. Assess, monitor, and manage third-party AI vendors to ensure they meet your governance standards and regulatory requirements.

 - Centralized vendor inventory with risk scoring and classification
 - Automated vendor assessment questionnaires aligned with AI regulations
 - Continuous monitoring of vendor compliance and performance
 - Supply chain risk visibility for all third-party AI systems

Risk Assessment

Comprehensive AI risk evaluation with automated scoring and mitigation recommendations

Audit Ready

Generate compliance reports and documentation ready for regulatory audits

Developer Friendly

RESTful API, CLI tools, and integrations with popular ML frameworks

Data Privacy

GDPR compliant data handling with advanced encryption and access controls

Global Standards

Support for EU AI Act, ISO 42001, NIST AI RMF, and regional regulations

Smart Workflows

Automated compliance workflows that adapt to your AI system's risk level

CONTROL NAME

1.1 AI Literacy and Responsible AI Training

1.2 Compliance with Union Harmonisation Legisla

1.3: Establish and Maintain Risk Management Sys for High-Risk AI Systems

Out of the box support for the most common regulations and acts

Flexible Deployment Options

Pick the deployment model that matches your security, compliance, and speed needs.
Same product, different control.

SaaS

Best for fast moving teams that want zero ops

Get started in minutes. We run the platform for you.

- ✓ Automatic updates, backups, and monitoring.
- ✓ High availability with built in scaling.
- ✓ Optional regional data hosting for EU, US, or Canada.

Data is stored in our secure cloud. You keep ownership of your content.

or

Self-Hosted

Best for enterprises with strict security requirements

Deploy in your cloud with full data and network isolation.

- ✓ Private networking and customer managed keys.
- ✓ You control release windows and change approvals.
- ✓ Same features and support as SaaS, with more control.

We provide setup guidance and enterprise support.
